Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over TOSHIBA AVE KK [TOSA] (JP 10103827 A) in view SONODA M [SONOI] (JP 09243237 a). TOSA discloses a cover assembly of a refrigerator 10 comprising a cover 22a for covering a machine room 22 having a water supply valve 42, the valve 42 being connected to a hose/path 48 for supplying water to a refrigerator. TOSA discloses the invention substantially as claimed as stated above. See the Fig. 1, 3 and 4 and the enclosed translation. TOSA does not disclose an opening and protection cap or cover detachably fastened to the cover opening. SONOI teaches the use of a cap 5 to cover the opening of a valve of a refrigerator for the purpose of covering and protecting the valve. See Fig. 1 and the enclosed English language abstract. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made

Art Unit: 3744

to modify the refrigerator of TOSA in view of SONOI such that a detachable cap could be provide in order to cover and protect the water valve.

Response to Arguments

Applicant's arguments, see remarks, filed 08/26/05, with respect to the rejection(s) of claim(s) 1-5, 7-11 under 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of new prior arts.
